

VOTING FOR OUR FAMILIES

A Voter Guide from Asian Communities for Reproductive Justice

Vote **NO** on Prop 4

to protect our
youth, families,
& communities!

Prop 4 seeks to change the California Constitution to ban abortions for minors until 48 hours after a physician notifies their parents.

Youth need health care, NOT laws that create barriers to health care.

Some youth may avoid seeking reproductive health services if they think their parents will find out. As people of color and immigrants, our families *already* face challenges in accessing health care. Prop 4 makes it worse!

Youth need sexual health education, NOT laws that take money from schools and services.

Youth need information and resources to take good care of themselves and make healthy decisions. Prop 4 doesn't increase information and services for youth – it takes them away. That's why so many teachers, counselors, nurses, and doctors are against Prop 4.

Youth who are pregnant need support, NOT unrealistic laws that make it harder for youth to get help from adults.

The majority of youth who are pregnant tell their parents so they can get support. But good family communication can't be mandated. In the real world, some youth face rejection or abuse from their parents. Prop 4 does *not* protect youth from harmful situations and makes it harder for youth to get help from supportive adults.
